

The role of the Oversight Board is to:

- provide recommendations on the strategy and direction of the BHF Data Science Centre to the BHF and HDR UK Board;
- provide independent scientific oversight and advice
- review progress against key deliverables according to the centre's strategic plan;
- support the centre director and her team in achieving the centre's goals;
- advise on maintaining alignment of the centre's activities to BHF strategy;
- aid and support alignment with key partners and stakeholders;
- advise on ways in which the centre's national and international reach and reputation can be built and upheld.
